

Business Report

Food Delivery Performance & Customer Analytics

Key KPIs

- Total Orders: 28,000
- Revenue: ₹9.33M
- Profit: ₹0.99M
- AOV: ₹333
- Avg Delivery Time: 46.0 mins
- Cancellation Rate: 8.3%

Insights & Recommendations

1. Observation: High traffic materially slows delivery
Impact: Severe traffic orders take 55% longer than low traffic orders.
Recommendation: Use traffic-aware ETA buffers and partner repositioning during dinner peaks.
2. Observation: Weekend orders lift AOV
Impact: Weekend AOV is ₹356 vs weekday ₹324.
Recommendation: Launch premium bundles and family-combo offers on weekends.
3. Observation: Customer concentration drives revenue
Impact: Top 20% customers contribute 2389+ CLV threshold and a large share of revenue.
Recommendation: Create VIP retention campaigns for Gold/Platinum customers.
4. Observation: Rain and storm increase delay risk
Impact: Weather disruption creates visible spikes in delivery duration and low ratings.
Recommendation: Add bad-weather surge incentives and proactive customer messaging.
